👤 OBJECTIVE

Dedicated and results-driven QA Automation Engineer with three years of hands-on experience in Web and API automation. Proficient in designing, developing, and implementing robust automated test frameworks to ensure the quality and reliability of software products. Committed to continuous learning and innovation, aiming to contribute to a dynamic team in delivering high-quality, error-free software solutions. Seeking a challenging position to contribute my expertise in improving software quality and efficiency through automation and manual testing.

💼 JOB EXPERIENCE

QA Automation Engineer
TimeClock Plus, LLC (TCP Software) SEP 2022- PRESENT

Designed and maintained automated test scripts using industry-standard tools such as Cypress, Protractor using Page Object Mode (POM) for both web and mobile applications.
• Collaborated with cross-functional teams to understand requirements, identify test scenarios, and create detailed test cases for automation.
• Executed automated test suites, analyzed results, and reported defects in a timely manner, ensuring quick resolution and efficient development cycles.
• Contributed to the development of a custom test automation framework, enhancing reusability and scalability across projects.
• Conducted code reviews and mentored junior QA engineers to promote best practices in test automation.
• Participated in the planning and execution of regression, smoke, and sanity tests during each release cycle, ensuring product stability

Software Test Automation Engineer
Arkhitech, Islamabad DEC 2020 – AUG 2022

Collaborated with cross-functional teams to understand project requirements and objectives.
• Designed, documented, and executed comprehensive test plans and test cases for various software applications, including web and mobile applications.
• Conducted manual testing to identify defects, ensuring the software met quality standards.
• Automated test scripts using tools such as Cypress, Postman, Appium and JMeter, increasing test efficiency and reducing repetitive tasks.
• Conducted regression testing to verify software fixes and enhancements.
• Reported and tracked defects using bug tracking tools like JIRA, ensuring clear communication with developers and stakeholders.
• Contributed to continuous integration and continuous delivery (CI/CD) processes to streamline the testing and deployment pipeline.
• Collaborated with developers to resolve issues and ensure timely delivery of high-quality software.
• Actively participated in root cause analysis and helped implement preventive measures to avoid future defects.
• Mentored junior team members, assisting in their professional development and knowledge growth.

Event Monitor – Application Support
GRID Systems (Pvt) Ltd (Global Rescue LLC), Islamabad MAY 2020 - NOV 2020

Monitored smoking sensors in real-time to detect and respond to smoking events promptly.
• Developed and implemented monitoring protocols to ensure continuous data flow and immediate detection of anomalies.
• Implemented rigorous quality control procedures to validate incoming sensor data for accuracy and completeness.
• Collaborated with engineering teams to identify and rectify hardware or software issues affecting data collection.
• Established escalation procedures for critical alerts to ensure timely response.

🎓 EDUCATION

BS Software Engineering
Riphah International University

Software Quality Assurance, Web Developement, App Development, Desktop Application, Database Management Systems
FEB 2016 - FEB 2020

📋 CERTIFICATIONS

ISTQB®
INTERNATIONAL SOFTWARE TESTING QUALIFICATIONS BOARD

• Certified Tester Foundation Level (CTFL)

👤 SKILLS

• **Test Automation Tools:** Cypress, Protractor, Postman, JMeter, Appium.
• **Test Management Tools:** Jira, Asana, Redmine.
• **Continuous Integration:** Jenkins, GitLab, CircleCI, Docker.
• **Agile/Scrum Methodologies**
• **Programming Languages:** JavaScript, TypeScript, Java. C++, Android.
• **Version Control:** Git, Svn
• **Database:** SQL, Firebase, MongoDB
• **Operating Systems:** Windows, Linux, Mac
