MY CAREER PATH

Front-End Developer (ReactJS/NextJS)

AlphaSquad (October-2023 - Present)

- Developed a desktop application using Electron for cross-platform compatibility.
- Integrated 3D models seamlessly into the Electron app using Three.js for immersive user experiences.
- Implemented Next.js for efficient and dynamic web applications.
- Designed the user interface with a Tailwind CSS for a sleek and responsive look and feel.

Front-End Developer (ReactJS/NextJS)

QisstPay (October-2022 - July-2023)

- Ensured rigorous validation of user inputs for data integrity.
- Optimized page loading times with strategic coding approaches.
- Proficient in Git/GitHub for version control.
- Implemented Redux for enhanced state management.

Front-End Developer (ReactJS)

UpTech Sol (SMC-PVT) LTD (October-2021 - October-2022)

- Frontend ReactJS developer for a medical startup.
- Developed new features, built reusable components, and ensured input validation.
- Verified technical feasibility of UI/UX designs and optimized page loading time.
- Proficient in HTML5, CSS3, and client-side scripting (JavaScript, jQuery).
- Used Git/GitHub for version control.
- Worked with Front-End libraries: Material UI, React-Bootstrap, Bootstrap, Tailwind CSS, and Semantic UI.
- Implemented charts and graphs using Apex Charts, Chart.js, and React-Charts.
- Utilized Redux Toolkit for efficient state management.

Front-End Developer (Freelancer)

Fiverr/Upwork/LinkedIn (Sep-2019 - Present)

- Freelance frontend developer specializing in HTML, CSS, Bootstrap, and Tailwind CSS.
- Designed and implemented custom frontend solutions using Figma/Adobe XD.
- Integrated diverse APIs efficiently using various libraries.
